To whom it may concern:

As an instructor in the Mechanical Engineering Technology program at the Nova Scotia Community College, I taught Mike Sheppard junior level courses in Basic Electricity, Materials Science and AutoCAD. I have found Mike to be one of my most capable students with a very positive attitude. Mike has repeatedly demonstrated his maturity, willingness to learn, and consistency of work quality in every instance I have seen.

Mike is enthusiastic, attentive and hard working. His academic performance has been solid. Both in and out of class Mike presents himself with maturity and professionalism. He is able to work well in groups as well as independently.

In summary, I believe that Mike's combination of maturity, strong work ethic, and positive attitude would make him an asset to any engineering workplace. If you have any specific questions, please feel free to contact me at the telephone number below.

Sincerely,

Jeffrey M. George
